SMART CITIES – DRIVING A NEW ECONOMY

On Wednesday, March 16, 2016, the Alberta Centre for Advanced MNT Products (ACAMP) is proud to present the ACAMP Seminar Series. The seminar speakers will address 4 core segments which go into the makeup of a Smart City: Intelligent transportation systems, connected vehicles, sensors and control, and smart grids.

This is an excellent opportunity to learn about new developments in the industry, to meet active industry key members, and to establish new partnerships.
