ST. ALBERT RELEASES SMART CITY MASTER PLAN

On May 24, 2016 the City of St. Albert released its much anticipated Smart City Master Plan, which presents 22 strategies that will guide how the community will build upon and expand its Smart City efforts into the future.

One of the first of its kind in the world, the Master Plan was developed based on an extensive research and consultation approach. Pending its approval in September 2016, St. Albert will move forward with an ambitious implementation plan.

MISSED THE 2016 SMART CITY SYMPOSIUM?

The 2016 Smart City Symposium was a great success, with over 175 attendees, 30+ speakers, and 18 amazing sponsors. Attendees collaborated actively and discussed approaches to implement Smart City initiatives in their own organization or community.

AUTONOMOUS VEHICLE INPUT REQUIRED

Mahsa Ghaffari, a student at the University of Calgary, is conducting an online survey about autonomous (driverless) vehicles in Alberta.

This survey will take ~5-10 minutes to complete. Participation is free, voluntary, anonymous and confidential. No personal identifying information will be collected, and the University of Calgary has approved this survey. Participants are also entered in a draw for Tim Horton gift cards.

Please support this important research in the province! Link: <http://www.surveygizmo.com/s3/2534016/Autonomous-Vehicles-in-Alberta>

HAVE YOUR ORGANIZATION PROFILED!

The Alliance encourages all members to send us stories and pictures highlighting your Smart City efforts, research, products / services, etc. These will be featured each month to stimulate awareness and collaboration!

MEMBER SPOTLIGHT – CITY OF ST. ALBERT

Only minutes from Edmonton and home to over 64,000 connected residents, St. Albert is a safe and prosperous community ranked as one of the **best places to live and do business in Canada** on an annual basis.

St. Albert is also one of Alberta's most beautiful communities, known as Canada's *Botanical Arts City*. This phrase reflects the key things the community values, enjoys and celebrates. It helps St. Albert profile what makes it unique and special. For example, visitors could engage with Alberta wildlife in the Capital Region's only Provincial Park, smell the roses in Alberta's largest public rose garden, attend the renowned International Children's Festival, or shop the largest Outdoor Farmers' Market in Western Canada. This and so much more is available in St. Albert.

In addition, St. Albert is known as one of Alberta's leading Smart Cities – in fact, a growing **Smart City centre of excellence in Canada**, and a centre for urban innovation discussions.

St. Albert has completed dozens of Smart City projects to date, founded the dynamic Alberta Smart City Alliance, and released a unique Smart City Master Plan which guides how it will advance into the future. A recognized leader and collaborator, St. Albert is working to ensure it remains an efficient and progressive government, and that it contributes to the advancement of Smart Cities and markets outside of its borders.

For more information on St. Albert and its Smart City efforts, contact the St. Albert Smart City office at smartcity@stalbert.ca or visit www.stalbert.ca/smartcity.
